이석영 (Seok Young Lee), Ph.D.

세종대학교 지능정보융합학과
Department of Artificial Intelligence and Information Technology, Sejong University
lsy@sejong.ac.kr Google Scholar ORCID ICaR Lab.

SUMMARY

Seok Young Lee received his B.S. degree in the Department of Electrical Engineering at Pohang University of Science and Technology (POSTECH), Pohang, South Korea, in 2011, and the Ph.D. degree in the Department of IT Convergence Engineering (ITCE) at POSTECH, Pohang, South Korea, in 2018. From 2018 to 2019, he was a Staff Engineer at Samsung Electronics. From 2019 to 2025, he was an Assistant Professor in the Department of Electronic Engineering at Soonchunhyang University. Since 2025, he has been with the Department of Artificial Intelligence and Information Technology at Sejong University, where he is currently an Associate Professor and leads the Intelligent Control and Robotics (ICaR) Laboratory. His research interests include robust control theory, delayed systems, networked control systems, robot manipulators, and embedded systems.

INTEREST AREAS

Control theory: robust control, networked control, sampled-data control, neural-network-based systems, time-delay systems
Robotics: robot manipulators, adaptive sliding mode control, force/admittance control, multi-robot systems
Embedded systems: real-time implementation, motor control, sensor systems, on-device AI, signal processing

EDUCATION

Ph.D. IT Convergence Engineering (ITCE) Mar. 2011 – Feb. 2018
POSTECH, Pohang, Gyeongbuk, South Korea

- Dissertation : Stability Analysis of Systems with Time-varying Delays via Slack Matrix based Approaches
- Advisor: Prof. Poogyeon Park

B.S. Electrical Engineering (EE) Mar. 2007 – Feb. 2011
POSTECH, Pohang, Gyeongbuk, South Korea

- Thesis : Teleoperated robot arm based on ATmega128

High School Graduation Mar. 2004 – Feb. 2007
Gwangju Science Academy, Gwangju, South Korea

WORK EXPERIENCE

Associate Professor Sep. 2026 – Current
Sejong University, Seoul, Republic of Korea

Assistant Professor *Mar. 2025 – Aug. 2026*

- Department of Artificial Intelligence and Information Technology
  - Lectures: Probability and statistics, C programming, engineering mathematics, embedded systems, linear systems, nonlinear systems, etc.
- Intelligent Control and Robotics (ICaR) Laboratory
  - 3 Graduate students (1 Ph.D. candidate, 2 M.S. candidates)

Assistant Professor Sep. 2019 – Feb. 2025

Soonchunhyang University, Asan, Chungnam, Republic of Korea

- Department of Electronic Engineering
  - Lectures: Signal and system, automatic control, microprocessor, MATLAB programming, motor control, embedded programming, etc.

Staff Engineer Mar. 2018 – Aug. 2019

Samsung Electronics, Hwaseong, Gyeonggi-do, Republic of Korea

- Intelligent Control and Transfer Robot Laboratory, Mechatronics Team
  - Topics: Developments of servo drive, motion controller, S/W platform for control systems, vibration control algorithms, transfer robot, SCARA robot, rotary/direct-drive/linear motor control algorithms

RESEARCH ACTIVITIES

Resilient/Robust Control for Modular Manipulator Reassembly Systems Mar. 2026 – Feb. 2031
NRF Korea, Young Researcher Program (Type B) – Principal Investigator
- An integrated resilient and robust control framework for reassembly systems using modular heterogeneous manipulators

Training Program for AX-based Manufacturing Process Technology Mar. 2026 – Feb. 2031
Korea Institute for Advancement of Technology (KIAT) – Co-Investigator
- On-device AI manufacturing platform

Research Curriculum on Next-generation Mobility Communications Jul. 2024 – Feb. 2025
IITP – Co-Investigator

Networked Control Theory with Application to Platoon Mobility in V2X Environments Jun. 2024 – Jan. 2025
Daejeon–Sejong–Chungnam Regional Innovation Platform – Principal Investigator

RNA Innovative Talent Development Program Jan. 2023 – Feb. 2024
IITP – Co-Investigator

Robust Sampled Data Control for Networked Systems with Uncertainty Mar. 2020 – Feb. 2023
NRF Korea, First Research Grant – Principal Investigator
- Stability analysis and controller synthesis of networked systems
- Developments of sampled-data control algorithms

MPC Design for Time-delay Systems using Relaxation Techniques Sep. 2019 – Aug. 2020
Soonchunhyang University
- Stability analysis and controller synthesis of time-delay systems
- Developments of model predictive controller (MPC)

Motor and Motion Controller for Industrial Robots Mar. 2018 – Aug. 2019
Samsung Electronics
- Developments of S/W platform in servo drive and motion controller
- Developments of vibration control algorithms and robust control algorithms
- Robust control of transfer robot and SCARA robot
- Robust control of rotary motor, direct-drive motor and linear motor

Robust Control of Electro-Hydraulic Excavator Automation System Aug. 2014 – Oct. 2015
Doosan Infracore
- Modeling of electro-hydraulic system and system identification
- Developments of robust control algorithms including time delay controller and gain scheduling

Localization Algorithm in Underwater Environment Feb. 2012 – Nov. 2014
KIOST
- Developments of localization algorithms for underwater robot
- Direction and location estimation algorithms for sound sources by utilizing generalized cross correlation(GCC), particle filter, and recursive total least square (RTLS) algorithms

Smart Camera for High-speed TFT-LCD Panel Inspection Mar. 2011 – Feb. 2013
Nbiz
- Developments of smart camera for TFT-LCD panel inspection
- PCB artwork, developments of image processing algorithms and S/W platforms in embedded systems

ACADEMIC ACTIVITIES

KIEE Member(2019-), ICROS Member(2017-)

HONORS AND AWARDS

Young Researcher Award (신진연구자상) Oct. 2022
The Korean Institute of Electrical Engineers (대한전기학회), Information and Control Society

Outstanding Paper Feb. 2018
Department of IT Convergence Engineering, Pohang University of Science and Technology

Undergraduate Fellowship (Merit-based) Mar. 2007
Department of Electrical Engineering, Pohang University of Science and Technology

- Admission with the highest distinction
- Full tuition (granted for two semesters)
